La Fleur by Adron • 2026 WINNER • Liquid Domesticity

La Fleur is a monobloc polymer bar stool inspired by the lines, curves, and axial symmetry of flowering plants. The design explores how a single continuous surface can bend, twist, and converge to create both structure and ornament simultaneously. Each leg rises like a stem before merging into a subtle petal-shaped seat, allowing the form to communicate its inspiration without relying on literal imitation. Through advanced geometry and compound surfaces, strength emerges naturally from the form itself. La Fleur embodies radical contemporary design by merging biomimicry, manufacturability, and emotional resonance into a unified object that feels both familiar and unexpected.
